

Introduction

This is my Todo List Program, built with React Native. This application is designed to help me to manage my tasks efficiently while also incorporating features tailored for academic use. My Todo List Program provides a user-friendly interface and robust functionality to keep my tasks organized and on track.

Features

1. **CRUD Functionality:**
 - Create, Read, Update, and Delete tasks seamlessly.
2. **Add Tasks:**
 - Easily add new tasks to my list by providing essential details such as Name, School ID, Section Code, Course Description, Course Name, Academic Year, and even attach a photo for validation purposes.
3. **Delete Tasks:**
 - Remove any task from my list that I no longer need or have completed.
4. **Edit Tasks:**
 - Modify task details whenever necessary. Whether it's updating the task description, course name, or any other information.
5. **Display Tasks:**
 - View my tasks in a clear and organized manner, with all pertinent details displayed including Name, School ID, Section Code, Course Description, Course Name, Academic Year, and ID Picture/Photo for validation.
